How To Export Data From CrownSIS

CrownSIS allows a Superadministrator to download data in Excel format for portability. In the event you want to keep a backup of the data for yourself, or you have decided to move to a different platform, you can download the following data categories that are given below. Just click on the Excel icon to download data.

Please note that transactional data like Student Attendance, Scheduling and Gradebook data cannot be exported.

These master data can be exported and recreated into a local database or a different SIS very easily.
